

St. Gallen, 1st January, 2013

REACH Declaration

On 1st June 2007 the regulation (EG) Nr. 1907/2006 regarding Registration, Evaluation, Authorisation and Restriction of chemicals (REACH) came into effect.

SWISSLASTIC AG, domiciled in Switzerland, produces elastic and technical yarns and also compression hosiery and knitted goods. These are exclusively non chemical products, which when used according to specifications, do not emit any of the materials named in the REACH regulation.

In addition, our products meet the OEKO-TEX 100 Standard, which consists of the inspection of all textile relevant substances contained in the ECHA list, including any possible sensitive materials.

Yarns, fabrics and textiles are – whether natural or synthetic – products which according to special regulation, are not considered necessary for registration.

In order to guarantee product safety and also to respect the environment, we constantly closely follow the further development of the REACH regulation and continually assess the adherence to the law and need for action. Should the requirements of either our suppliers or our products change, we guarantee that the relative information will be passed on down through the supply chain, and the necessary steps will be taken.

We hereby declare, that to date SWISSLASTIC AG does not manufacture products which according to the REACH regulation, would necessitate either registration and authorisation, or a material safety data sheet.

Yours faithfully,

SWISSLASTIC AG ST.GALLEN

Danilo Pieri
Managing Director
